RECOMMENDATION

Dusan Tomanovic, student of the 2nd year of Graphic Design of the Faculty of Digital Arts in Belgrade, has during his studies shown a remarkable commitment and a very serious attitude towards the projects from the design and print media fields. As a creative young person with working knowledge of design software, Dusan manages to realize his ideas successfully. He is exceptionally creative, curious, operationally oriented with readiness to learn and work on upgrading his talent.

Features of his personal style are freedom of expressing ideas, consistency in following designer trends and capability to easily and swiftly convey them to various materials and techniques. As Dusan's professor I recognize a young design artist in him, who will surely advance through his schooling with his diligent work, and, apart from the above mentioned, those are some of the important reasons why I recommend him for the job on the position of graphic designer.

Graphic designer and Associate Professor of the Faculty of Digital Arts of the Metropolitan University **Neda Todorovic.**
